Experience

January 2015 — Present

Senior Web Developer, *Health Sciences Center, West Virginia University, Morgantown, West Virginia*

As lead developer in the web services group, I help plan, design, build, and maintain websites built on Umbraco CMS and small web applications that utilize the proprietary SOLE LMS. I conduct code and design reviews among the group to help improve code quality and enourage better design, and to ensure that websites are accessible and follow WVU brand guidelines. I help implement code methodologies and develop enhancements to current processes to increase efficiency and consistency. I also help write training and support materials.

November 2011 — December 2014

Interactive Developer, *PMI, Pittsburgh, Pennsylvania*

As a member of the PMI Digital team, my primary focus is on front-end development, including prototyping, UI development, JavaScript development, custom WordPress theme development, and providing UX design feedback. I design, build and maintain internal websites and landing pages.

June 2008 — Present

Independent Interactive Designer & Developer

As the lead designer for the web app Résunate, my responsibilities included wireframe creation, user testin

May 2011 — November 2011

User Experience Designer, *Careerimp Inc., Pittsburgh, Pennsylvania*

As the lead designer for the web app Résunate, my responsibilities included wireframe creation, user testing, and user interface design.

February 2011 — May 2011

Multimedia Developer, *Fargo Design Co., Pittsburgh, Pennsylvania*

My key responsibilities included existing site maintenance, front-end development, CMS implementation, and CMS template development. This involved breaking down web layouts in Photoshop and hand coding functional, standards based templates for WordPress and Joomla.

Skills

Strong understanding of usability, consistency, and communication of user interface design.

Fluent in hand-coded HTML5, CSS3, and jQuery to build standards based, cross-browser compatible web sites.

Experience developing on WordPress, Joomla, and Drupal.

Competent in using ActionScript 3.0 and XML to develop interactive web media.

Experience using custom media queries and front-end development frameworks including Bootstrap 3 and Foundation 5.

Fundamental knowledge of the implementation of PHP, JavaScript, SASS, and LESS.

Experience using Node.js, Bower, Grunt, Compass and Microsoft Team Foundation Server in workflow.

Proficient in using Adobe Photoshop, Illustrator, Dreamweaver, Flash, After Effects, Premiere, Encore, and Fireworks.

Education

2006 — 2008

ITT Technical Institute, *Pittsburgh, Pennsylvania*

Associate in Specialized Technology Degree, IT Multimedia
