Experience

January 2015 — Present

Senior Web Developer, *Health Sciences Campus, West Virginia University,* *Morgantown, West Virginia*
I plan, design, build, and maintain websites built on Umbraco CMS and small web applications that utilize the proprietary SOLE LMS, and I help with writing training and support materials. I conduct code and design reviews among the group to help improve code quality and to ensure that websites are accessible and follow WVU brand guidelines. I help develop enhancements to current processes and implement code methodologies to increase efficiency and consistency.

November 2011 – December 2014

Multimedia Producer, *PMI,* *Pittsburgh, Pennsylvania*
As a member of the PMI Digital team, my primary focus was on front-end development, including prototyping, UI development, JavaScript development, custom WordPress theme development, and providing UX design feedback. I planned, designed, built, and maintained internal websites and landing pages. I also assisted with creating motion graphics using After Effects.

June 2008 – December 2014

Freelance Front-end Designer & Developer
I worked with companies and individuals to plan, design, and build their websites; specializing in custom Wordpress development.

May 2011 – November 2011

User Experience Designer, *Careerimp Inc.,* *Pittsburgh, Pennsylvania*
As the lead designer for the web application Résunate, my responsibilities included wireframe creation, user testing, and user interface design.

February 2011 – May 2011

Multimedia Developer, *Fargo Design Co.,* *Pittsburgh, Pennsylvania*
My key responsibilities included existing site maintenance, front-end development, CMS implementation, and CMS template development. This involved breaking down web layouts in Photoshop and hand coding functional, standards based templates for WordPress and Joomla.

Skills

Strong understanding of content strategy, usability, consistency, and communication of user interface design.

Fluent in hand-coded HTML5, CSS3/SASS, and JavaScript/jQuery to build responsive, accessible, standards based, cross-browser compatible websites.

Proficient in using BEM naming conventions and ITCSS CSS architecture.

Experience using responsive front-end development frameworks including Bootstrap and Foundation.

Experience developing on various content management systems including Umbraco, WordPress, Joomla, and Drupal.

Fundamental knowledge of the implementation of PHP and C#/.NET.

Experience using Git, BitBucket, Jira, GitHub, Node.js, Grunt, and Microsoft Team Foundation Server in workflow.

Proficient in using Adobe Photoshop, Illustrator, After Effects, Premiere, and Encore.

Experience building cross-client email campaign templates.

Education

2006 – 2008

ITT Technical Institute, *Pittsburgh, Pennsylvania*
Associate in Specialized Technology Degree, IT Multimedia
